April 22, 2021

As the Somervell County Judge, I feel it necessary to address statements made by a City Elected Official of Glen Rose in a letter received by potential voters in the upcoming City Council Election.

There have been many statements made about the Somervell County Commissioners Court the last couple of weeks and some of the statements are not accurate. **Please consider the following:**

Fact: The Somervell County Commissioner Court serves **all citizens** of Somervell County regardless of where they reside, the City or the County, and we are proud to do so.

Fact: Commissioner Court Members have met one on one with current and potential future City Council Members to discuss many items and at **no time were any of them sympathetic to the County Official's wishes**. Every member from both governing bodies stood firm and fought hard for what they felt would be best for the taxpayers who elect them.

Fact: There have been proposed agreements presented to the City from the County through the City's Attorney. **The current Mayor chose not to call a meeting to present these agreements to the elected governing body**. If the agreements had been presented and reviewed, perhaps the Elected Council would have had a chance to amend any changes they felt needed and sent back to the County for review.

Fact: The two elected governing bodies as a whole can and are willing to work together to solve all issues and discuss any interlocal agreements that exist between the two entities.

Fact: At no time has it been mentioned raising taxes on the County or the City side. What was discussed was a ten year plan to phase in how the City Entity could start to help out with expenses related to services provided by the County.

Fact: As Judge of Somervell County I represent each and every citizen whether you have lived in this community for one day or 100 years!

In closing, please do your research and ask questions. I know that all the members of the Commissioners Court are willing to discuss any and all issues at hand. I also feel current and potential future City Council Members are also willing if given a chance.

Thank you for your time, respectfully,

Danny L. Chambers
